### STATEMENT OF FACTS

is Property, totaling approximately 56 acres particularly described and depicted in Exhibit "A", attached hereto and incorporated herein by this reference. The property is located approximately 18 miles west of Goleta, at 14730 Hwy 101, Goleta, in This property is more Santa Barbara County, California 93117. specifically described as Santa Barbara County Assessor's Parcel No: The Covenantor was remediating the Property under the Α portion Department. authority of the and supervision approximately 13 acres was remediated following a Remedial Action Plan pursuant to Chapter 6.8 of Division 20 of the Health and Safety Code. Because hazardous substances, as defined in H&SC Section 25316, which are also hazardous materials as defined in H&SC Section 25260, including benzene, toluene, xylenes, mercury and polychlorinated biphenyls (PCB's) remain in the soil and groundwater in and under portions of the Property, the Remedial Action Plan provided that a deed restriction would be required as part of the site remediation. A Covenant to Restrict Use of Property was recorded February 18, 1992 (1992 Covenant). The Department circulated the Remedial Action Plan, which contained a Final Health Risk Assessment, together with a Draft Negative Declaration pursuant to the California Environmental Quality Act, Public Resources Code Section 21000 et seq. for public review and

Negative the Action Plan and comment. Remedial The by the approved Declaration/Environmental Impact Report were Department on May 6, 1994. Excavation and offsite disposal was selected as the preferred remediation approach. The response action also included the installation and operation of groundwater monitoring wells. The locations of the monitoring wells are shown on the (Map #1). The operation and maintenance of the attached map groundwater monitoring wells is pursuant to an Operation and Maintenance Manual incorporated into the Enforceable Agreement-Remediation Monitoring Plan (EA-RMP) between Covenantor and the Department dated September 2, 1997.

1.02. As detailed in the Final Health Risk Assessment as approved by the Department in October, 1992, subsurface soils and the groundwater contain hazardous substances, as defined in H&SC Section 25316, which include the following contaminants of concern: henzene, toluene, ethylbenzene, xylenes, mercury and polychlorinated biphenyls (PCB's). The Department concluded that the Property, as remediated, and subject to the restrictions of this Covenant, does not present an unacceptable threat to human health or safety or the environment, if extraction of the perched groundwater contained in the Fill Pad is prohibited. Contaminants in the perched water include benzene (2,300 µg/l and PCB's (22 µg/l).

26

27

25

California drinking water standards are: Benzene at 1  $\mu g/l$  and PCB's

at 0.5  $\mu$ g/l. The Department concludes that, if extracted, the perched

groundwater presents an unacceptable threat to human health and
